Education

Bachelor's in Technology (Computer Science in Specillization with Artificial Intelligence)
from, [Medicaps University \(2020-2024\)](#) **CURRENT**

High Schooling with Science Stream
from, [Brilliant Higher Secondary School, Indore \(2018-2020\)](#)

Skills

I am proficient in Frontend Development using Technologies like: ReactJS, HTML, CSS/SCSS, JavaScript

Languages I know: C++, Python, JavaScript

Tools and Technologies I use: Git, GitHub, Node(NPM), Figma, Adobe XD, VSCODE

Currently, I am learning ReactJS and planning to learn ExpressJS Framework, MongoDB, and complete MERN Stack.

Interests

I am community people. I love to contribute to Open Source Projects and add more value. I am active in so many Tech Communities where we discuss about Tech, Open Source, Hackathons, Projects, Discuss Issues, Mentor each other with various things and all the contributions we make really makes a huge impact the community.

Also, I have a huge interest in mentoring people in these communities, taking online/virtual/in-person workshops and session on tech-related topics. My favourite topics of discussion are Open Source Development, Hackathons & Community Building. I have also been a part of various big/small level hackathons.

Experience

Graphic Designer Intern
[@Bullseye Marketing - Mumbai](#)

I designed several posts for the company's social media accounts. With this internship, I was able to engage directly with clients and create content that met their requirements. I produced blogs, logos, and brochures for several domains and sites in addition to the carousel post.

Collaboration with the company's web development team improved my UI skills, and I also developed a number of static websites for various clients.

Hekors - Community Member

This is one of the great communities, I have ever visited. In the community, I am a developer and project maintainer. I worked on the community website and created a discord management server for the members of the community. I also serve as a mentor/coach here, leading sessions/workshops/discussion meetings on themes such as Techpreneurship, Personal Branding, Open Source, Profile Building, Networking, Hackathons, Languages, and a variety of other Soft/Hard Skill topics.

Executive Member - Designing Team
[@CMC \(CodeChef Medicaps Chapter\)](#)

Here, I and my team manages all the Graphics related things for various events, sessions, workshops. We make banners, posters, memes, edit videos, and many more stuff which help our events to get more people and grow the community engagement - As the design plays an important role. With all these things, Our main motive is to spread the culture/interest of doing competitive programming and helping them with the same.

Volunteership & Activities

Moshify - Cloud Service Website Interface
www.devnishant.design

Hackathon Volunteer [@Kent Hack Enough By, Kent Hack Community in association with MLH](#)

Other than these, I have participated in many hackathons where we made so many amazing projects and continued making them after the hackathons too. Also, Participated into Open Source Events like, SWoC, Local Hack Day, Hacktoberfest, KWOC etc.
